CORNELIUS CONFIDENCE.

[NOW AVAILABLE IN ICE]

INTRODUCING

***XTREME* ICE™**

Our XTREME Commitment

For decades, our world-renowned beverage dispensing line has been the undisputed leader in performance and reliability. The tradition continues with the creation of our new XTREME ICE™ series – always delivering a full bin of rock-solid ice. Take a closer look at the exciting features we pack into every Xtreme Icemaker. The advantages are crystal clear.

XTREME Series = Low Energy Costs

The Xtreme Series leads the way in energy efficiency. The compressor and the condenser are matched precisely to provide the perfect balance between water and electrical use.

In addition, the Xtreme Series utilizes a special nickel-plated copper evaporator plate that provides 28 times the thermal conductivity of a standard stainless steel plate. As substantiated by ARI's published data, the Xtreme Series typically provides a lower kilowatt-hour consumption and water usage rate per 100 pounds of ice produced. Xtreme beats the competition cold!

XTREMELY Reliable

The Xtreme Ice Series takes reliability to a new level. We've reinforced key components and refined manufacturing processes to ensure years of reliable and durable service. The thickness of our evaporator plating has been increased by more than 200%.

Our exclusive ice harvest control system (patent pending) uses a special pressure transducer that has no moving parts and doesn't contact the water. The new control was put through an extensive durability test that simulated 10 years of ice making (300,000 cycles) without production drift or failure!

XTREME Merchandising

The Xtreme Series can be equipped with an integrated merchandising panel. Another industry first!

- Premium merchandising space
- Simple slide-in panel
- Customize your message

AN INDUSTRY FIRST • A Cornelius Icemaker Exclusive

EPA registered and NSF listed, Microban® antimicrobial product protection inhibits the growth of bacteria, mold, mildew and fungi that cause odors and stains.

- Microban® protection is built into the ice-making food zone, bin and other key components.
- Inhibits the growth of odor and stain causing microorganisms.
- Cleaner Equipment = Better Quality Ice

Microban® protection is built into the ice system. It's a permanent feature of the plastic components. Microban® protection never wears out. It never washes away and never stops working.

MICROBAN® AND THE MICROBAN SYMBOL ARE REGISTERED TRADEMARKS OF THE MICROBAN PRODUCTS COMPANY, HUNTERVILLE, NC.

Microban® Protected

Without Microban® Protection

Photos were documented in extensive real-world testing of equipment with and without Microban® product protection.
